Tiler's sponge

Premium

&

Standard

Available in cut-in and non cut-in versions. The cut-in sponge offers enhanced debris pickup from joints and crevices for superior cleaning results.

High-quality two-component ergonomic handle combining durable plastic and soft-touch rubber for maximum comfort and control

Premium-quality porous sponge offers extended durability and superior debris absorption for more efficient cleaning performance.

Tiler's trowels

Premium

&

Standard

127128E(4-12)

Notched trowel made of 0.7 mm thick stainless steel with an aluminium bar, designed for tiling (notches from 4 to 12 mm). Features a two-component handle for enhanced comfort and grip.

127713279E4-2KFR(M-D)

Notched trowel with patented Frosi pattern that eliminates gaps and air pockets when pressing tiles into adhesive. Made of silver cold-rolled stainless steel with a 0.7 mm thick blade. Features a powder-coated aluminium bar and an ergonomic two-component handle.
